Dear Mr. Bustamante

Good day.

We are 2nd-year students from Technological University of the Philippines – Taguig taking the program Bachelor of Technical-Vocational Teacher Education Major in ICT - Computer Programming, currently enrolled in the subjects Introduction to Web Programming and System Analysis and Design. As part of our final project, we aim to develop a prototype of an Information System aimed at addressing a specific challenge or requirement within a real-world organization.

We would be honored to work with your esteemed company/organization as the basis for our project. Our goal is to design a practical and innovative solution to streamline operations or address a business challenge, utilizing modern web programming technologies.

Could we kindly request your company to be the focus of our study? We assure you that any information shared will be treated confidentially and used solely for educational purposes. Additionally, please note that our university will also assess the impact of our project on your organization/business.

Thank you for considering our proposal. We eagerly await your positive response and the opportunity to collaborate.

Sincerely,

**PALALLOS, FRIA RICA S.**
